

Experiment No : 01

Experiment Name : Making a Floor Plan Using AutoCAD

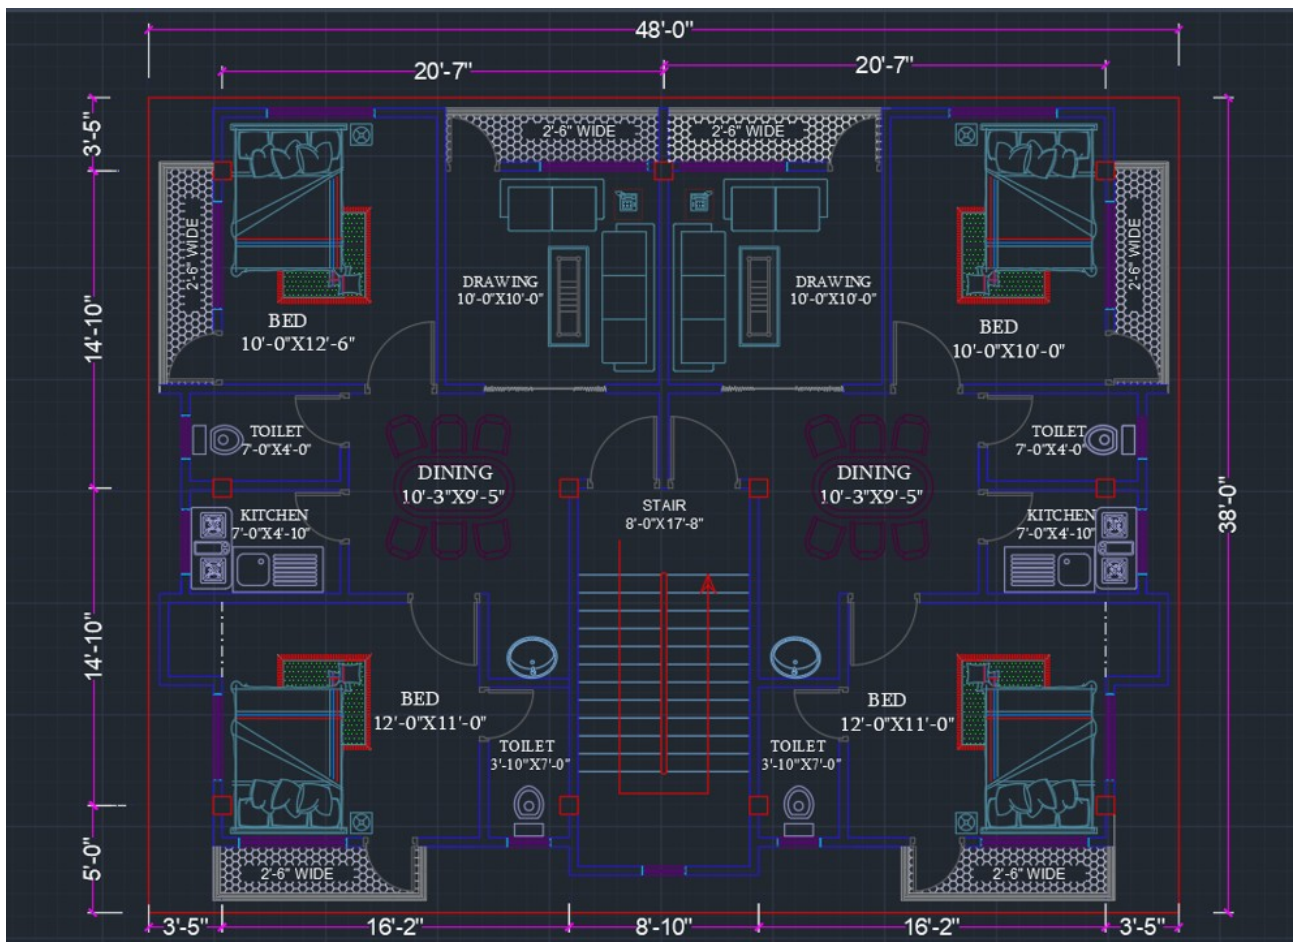

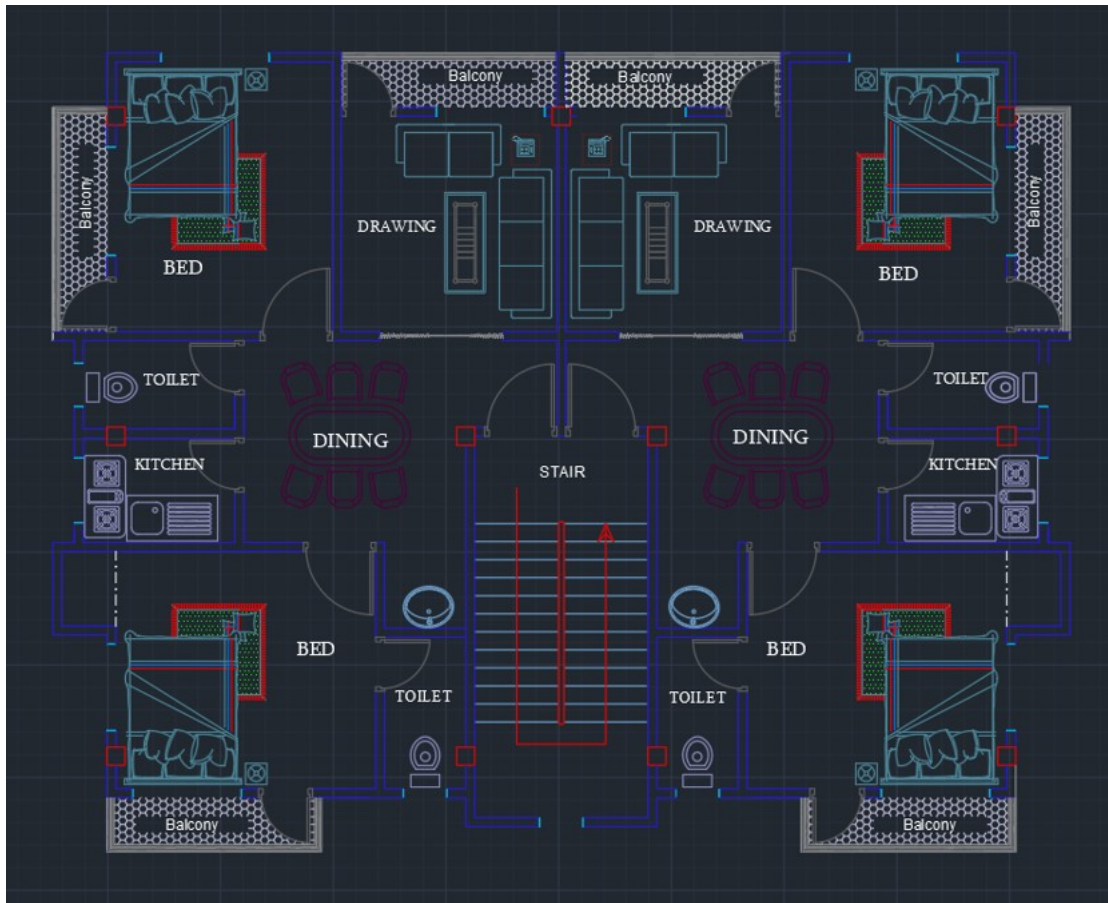

Details :

- 4 Bedroom
- 2 Kitchen
- 2 Dining Room
- 2 Drawing Room
- 6 Belcony
- 4 Toilet
- 2 Store Room

Flowchart :

Procedure :

- 1. Make a plan which I would like to draw in AutoCAT**
- 2. Then use rectangle, line, circle etc. for draw the design.**
- 3. Use trim tool to cut any extra line or shape that I don't want to use in my drawing**
- 4. Measure every room and make them as plan**
- 5. Use some furniture to make those room beautiful**
- 6. Make door and windows to add it whenever needed**
- 7. Use hatch too for emerge my plan**

Experiment No : 02

Experiment Name : Making a Chair Using AutoCAD

Front View :

Top View :

Left View :

Right View :

Procedure :

- 1. Make a plan which I would like to draw in AutoCAD.**
- 2. First er create a base for chair.**
- 3. Then draw to top view for my chair.**
- 4. Draw the front view for my chair.**
- 5. Draw the Right view for my chair.**
- 6. Draw the left view for my chair.**
- 7. Use extrude(Solid) command to convert all view into 3D chair.**
- 8. Use fillet to round some of my drawing point.**
- 9. Use RMAT to open materials properties.**
- 10. Finally, render chair**

Experiment No : 03

Experiment Name : Making a Table Using AutoCAD

Front View :

Top View :

Right View :

Procedure :

11. **Make a plan which I would like to draw in AutoCAD.**
12. **First er create a base for table.**
13. **Then draw to top view for my table.**
14. **Draw the front view for my table.**
15. **Draw the Right view for my table.**
16. **Draw the left view for my table.**
17. **Use extrude(Solid) command to convert all view into 3D table.**
18. **Use fillet to round some of my drawing point.**
19. **Use RMAT to open materials properties.**
20. **Finally, render table**
